

Illinois Oral Health Conference

September 7 & 8, 2017

Marriott Bloomington-Normal Hotel & Conference Center

201 Broadway Avenue

Normal, Illinois 61761

10 CEU's for the Dental and other Professionals

Illinois Public Health Association will sponsor: Nursing, CHES, LPC

Thursday, September 7, 2017

9:30-10:00 am **Registration**

10:00-11:00 am **Welcome and Opening Keynote, Mona Van Kanegan, D.D.S., M.S., M.P.H.**

11:00-12:00 pm **Oral Health in Illinois: Implementation and Action**

This session will focus on the Illinois Oral Health Report and developing policy agenda to improve the access to care and key oral health messages, initiatives, and concrete objectives and goals to improve access to dental and oral health in Illinois.

Stephanie Altman, J.D., Sargent Shriver National Center on Poverty Law

Andrea Kovach, J.D., Sargent Shriver National Center on Poverty Law

12-15-1:15 pm **Lunch**

1:15-2:15 pm **Concurrent Sessions**

A. An Informative Look at the Illinois School-Based Oral Health Program

Sherry Foran, R.D.H., B.S.D.H., M.P.A., Illinois Department of Public Health

Mary Christen, R.D.H., B.S., Illinois Department of Public Health

B. ER Diversion Clinic

Mary-Margaret Looker, D.D.S., Central Counties Health Center

C. Oral Pathology Updates

Kirk W. Noraian, D.D.S., F.A.C.D., F.I.C.D.

2:30-3:30 pm **Concurrent Sessions**

A. Implementation of Tooth Brushing in Schools Promotes Positive Oral Health Habits

Carla Pohl, D.N.P., A.P.R.N.-C.N.M., Mennonite College of Nursing, Illinois State University

Yvette Pigman, D.N.P., A.P.R.N.-F.N.P., B.C., Mennonite College of Nursing, Illinois State University

B. How to Build a Successful Dental Quality Measurement Program

Dina Girgis, D.D.S., Crusader Community Health
Kathy Olson, R.D.H., B.S., Crusader Community Health

C. Emerging and Traditional Tobacco Products: Do You Know All You Need to Know?

Sharee Clough, R.D.H., M.S.E.d., American Dental Association

3:30-4:00 pm **Break with Exhibitors**

4:00-5:00 pm **Increasing Children's Access to Oral Health Education and Care through Community Dental Health Coordinators**

The Illinois Oral Health Workforce Grant Program is a three year project funded by the Health Resources and Services Administration (HRSA). The program collaborates with dental hygiene colleges and community-based organizations in Illinois to increase the number of dental hygienists trained as Community Dental Health Coordinators (CDHC). The CDHCs will expand community outreach services to increase the number of children who are actively participating in dental sealant programs and who are linked with follow-up care, especially in dental health professional shortage areas.

Carla Cox, M.P.H., C.H.E.S., Illinois Department of Public Health
Dolores Ickis, R.D.H., B.S., M.S., Prairie State College
Kimberly Nay, R.D.H., Will County Community Health Center
Alejandra Valencia, D.D.S., M.P.H., M.S., The Oral Health Forum and Heartland Health Outreach
Jane Grover, D.D.S., M.P.H., American Dental Association

5:00 Reception~Silent Auction

Friday, September 8, 2017

8:30-9:00 am **Registration and Continental Breakfast**

9:00-11:00 am **Addressing the Opioid Epidemic**

This session will discuss alternatives to opioid pain medications, risks and benefits of opioid and the alternatives; national, state, medical society, and local guidelines, tools, and resources to ensure patient safety including the PDMP, patient education tips and a discussion on when to refer to pain management and substance use treatment. The McLean County Coroner will discuss the impact of the opioid epidemic on the county.

Alaa Abd-Elseyed, M.D., M.P.H., University of Wisconsin, School of Medicine and Public Health

Kathleen Davis, M.D., McLean County of Illinois Coroner

11:00-12:00 pm **Adding a Dental Benefit to Medicare**

Over 55 million seniors enroll in Medicare for healthcare benefits. However, one of the missing components is a dental benefit. Partnering with the DentaQuest Foundation and Oral Health 2020 Network, OHA has worked on including a dental benefit in Medicare since 2015. This collaborative effort engages experts in aging, Medicare and health policy to work toward inclusion. OHA's two symposia's have developed a framework for moving forward in three working groups, coordinated by OHA. The presentation follows the structure of the project:

- *Policy/Procedure: The structure of a proposed benefit in Part B and its cost*
- *Marketing/Communications: 3-pronged strategy to reach Consumers, Partners and Policymakers, including research completed to drive development of a consumer campaign*
- *Politics: Legislative strategies necessary to advance the benefit on the political agenda*

Bianca Rogers, Oral Health America

12:00-12:30 pm **Lunch**

12:30-2:30 pm **Hot Topics**

- Illinois Managed Care (MCO's) changes effective January 2018
 - Approximately 80% of Medicaid will move to MCO's
 - Possible new plan administrators
 - Report Card for Oral Health in Illinois
- The Public Health Dental Hygienist
 - Rules
 - The role of the Public Dental Hygienist

Clinical Session for the Dental Professionals

3 CEU's Available

Friday, September 8, 2017 from 9:00am to 12:00pm

Dentists \$80

Dental Hygienists \$60

Dental Assistants \$60

*no additional fee for registrants already registered for the 2017 Illinois Oral Health Conference

OSHA/Infection Control and Maintenance of Dental Handpieces and Related Instruments.

Description:

This course will complete the necessary requirements for OSHA/infection control in the dental office. Upon completion, the attendee will be able to summarize how their office is complying with the

CDC guidelines and make necessary adjustments if needed to their workplace to keep both dental personnel and the patient safe in the dental environment.

Infection Control in dental settings has been an important topic for decades. This is especially true since the possible transmission of HIV, from a dentist to several patients, which made headlines in the early 1990's. Shortly thereafter, the Centers for Disease Control (CDC) published the "Recommended Infection-Control Practices for Dentistry, 1993." This was followed by the updated and consolidated CDC "Guidelines for Infection Control in Dental Health-Care Settings – 2003" and the March 2016 CDC "Summary of Infection Prevention Practices in Dental Settings – Basic Expectations for Safe Care." Yet, there are still misunderstandings in the dental community about what the actual guidelines recommend, and just how a licensed dental clinician is held accountable to these, so called, "guidelines and recommendations." To that end, there are specific CDC recommendations that are paramount to proper instrument infection control practices as well as State law and State Dental Board rules that necessitate compliance with CDC as a condition of licensure in that State. Proper dental instrument maintenance along with the various manufacturers' recommendations for maintenance and sterilization often provides compliant infection control strategies. And proper maintenance of instrumentation often boasts of better instrument function and longer lasting equipment.

Educational Objectives:

Upon completion of this educational activity, the participant will be able to:

1. Understand the history of current infection control guidelines
2. Understand and discuss key requirements of the CDC guidelines for dental settings
3. Understand clinician accountability to the infection control guidelines
4. Implement proper maintenance and instrument sterilization techniques
5. Avoid common mistakes

OSHA OBJECTIVES:

1. Describe the importance of infection control in the dental office
2. List the routes of infection, the components in the chain of infection and ways to prevent the spread of infection
3. Describe the types of infection and the stages of infectious diseases
4. Identify infectious disease that pose a risk of transmission in oral healthcare
5. Describe the recommended guidelines for wearing and removing PPE and describe its purpose
6. Prepare the dental environment prior to patient care
7. Describe and perform proper hand washing technique
8. Describe and perform pre-procedural rinse
9. List and describe the various governmental agencies associated with informing, educating and protecting the public
10. Describe the purpose and scope of OSHA's Bloodborne Pathogens Standard and its importance to dental employees
11. Determine the vaccinations required for employment in the dental office
12. Identify staff members who may be at risk by determining employee categories of all personnel
13. Describe proper disinfection and sterilization techniques

Speaker Profiles:

Doug Mayer is currently in his 25th year in the dental handpiece business. He is an expert in dental handpiece design, use, maintenance, and infection control. He has designed several current generation handpiece systems as well as written the handpiece maintenance and infection control protocols for the two largest handpiece companies in North America.

Annette Hayes has been with Patterson Dental as a technical advisor and educator. Annette brings her many years of experience in private practice and 5 years as adjunct instructor at Des Moines Area Community College for the Dental Hygiene and Dental Assisting departments to the position.
